S.B. JAIN INSTITUTE OF TECHNOLOGY MANAGEMENT & RESEARCH, NAGPUR

Practical 11 [Open Ended]

Aim: To design and develop a **web-based simulator** that demonstrates important Operating System algorithms such as CPU Scheduling, Page Replacement, Disk Scheduling, and Deadlock Avoidance using an interactive interface.

OS Simulator

File C:/Users/ekant/OneDrive/Desktop/OS-SIMULATOR/index.html

Operating System Algorithm Simulator

SJF Scheduling

10,5,20 Run SJF

LRU Page Replacement

1,2,3,4,1,2,5 Run LRU

SSTF Disk Scheduling

98,183,41,122,14 Run SSTF

Banker Algorithm

Allocation 0 1 0 | Max 7 5 3 | Available 3 3 2 | Check Safe State
